

CloudBiometry is a product of Allied Time USA, Inc.

Cloud Biometry Privacy Policy

We respect the privacy of our users. CloudBiometry is a software application that provides employers with a platform through which the employers can manage their employees (the “Software”). The Software is hosted online and accessible through <https://mycloudtime.com> (the “Site”), includes several separate modules that provide support time tracking, and any other functionality that CloudBiometry may make available from time to time. This privacy policy (“Privacy Policy”) explains the type of information (“Information”) we collect from the users (“Users”), how the Information may be shared with third parties, and what controls Users have regarding their Information. The Privacy Policy also sets forth our policies and practices with respect to any data received from our Customers (“Customers”) or Customer employees (“Customer Employees”) who use our products or services. Please review the following Privacy Policy carefully to understand our practices with respect to your Information. We may amend this Privacy Policy from time to time as we change or expand our Website. Because this Privacy Policy contains legal obligations, you should read it carefully.

By using or accessing the Website, you signify that you have read, understand, and agreed to be bound by this Privacy Policy.

What Information We Collect

To the extent Customers choose to utilize any of our products that employ finger-scan, palm-scan or facial-scan technology, the collection of Customer Employee biometric scan data is undertaken and controlled by the Customer and may include the collection by the Customer of information to verify Customer Employee identities. This technology does not collect or store fingerprints, palm prints or facial data; instead, it creates a mathematical representation of particular data about the fingertip, palm or face in a much smaller template that is encrypted for security purposes. We may collect, receive, store, or process biometric scan data supplied by or about Customers and/or Customer Employees to provide products and/or services to Customers. We may also have a third party host such data. In that event, we only provide them information needed to perform that specific service or function.

How We Use the Information Collected

We use the information that you provide, including Personal Information, to perform the services requested. For example, if you provide your contact information, we will use the information provided to contact you about your interest in our services or to schedule a demonstration of our products. We also collect Personal Information in connection with the purchase of our products: however, the processing of payment card information for such purchases is conducted by a third party with whom we share only certain Personal Information of yours to enable the transaction. We also may use Personal Information for marketing purposes. For example, we may use the information you provide us to contact you to further engage your interest in our services and to send you information regarding us.

If we collect, receive, store, or process Customer Employee data, we only do so in accordance with this Privacy Policy and as-instructed by the Customer. Customer Employee finger-scan, palm-scan or facial-scan data is only used to provide products and/or services consistent with the Customer's instructions and only as directed by the Customer. The Customer is able to request that we permanently destroy any finger-scan, palm-scan or facial-scan data, even if processed by us, and is responsible for permanently destroying any biometric scan data as required by applicable law. We will permanently destroy any finger-scan, palm scan or facial-scan data within 60 days of a Customer's notification to us that the initial purpose for collecting or obtaining such data has been satisfied or within three years of a Customer's account having Closed status, whichever is earlier, unless required by applicable law to retain the data. The Customer is also responsible for obtaining all consents and providing all notifications or information as may be required by applicable law. Customer Employees should contact the appropriate person within their employer's organization in order to understand, access, change and/or control what is provided by the Customer to us.

We do not sell, trade, or rent users' personal identification information to others. We may share generic aggregated demographic information not linked to any personal identification information regarding visitors and users with our business partners, trusted affiliates and advertisers for the purposes outlined above. We may use third party service providers to help us operate our business and the site or administer activities on our behalf, such as sending out newsletters or surveys. We may share your information with these third parties for those limited purposes provided that you have given us your permission. We will not disclose, sell, lease, trade, or otherwise profit from Customer Employee finger-scan, palm scan or facial-scan data. We will not otherwise disclose Customer Employee finger-scan or facial-scan data unless required or permitted

by any state or federal law, municipal ordinance, valid warrant, or valid subpoena.

Security of Personal Information

We have taken commercially reasonable steps to ensure the security and confidentiality of Personal Information against loss, misuse, unauthorized disclosure, alteration, and destruction. Please keep in mind that no transmission of data over the Internet or any wireless network can be guaranteed to be 100% secure. As a result, we cannot and do not guarantee the complete security of Personal Information you provide to us through your use of this Website. All Customer Employee data obtained through finger-scan, palm scan or facial-scan technology is protected from disclosure using the reasonable standard of care within the industry. Our commitment is that this data will be protected to the same level that the Company stores, transmits, and protects other confidential and sensitive company information.
